RE: Relocating of express care and emergency room renovation.

Dear Tom,

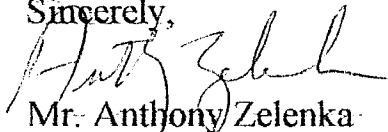

The last phase of our project is scheduled for inspection the week of January 20, 2002. It has caused me to reflect on both the progress and workmanship of the project and I would like to share my thoughts with you.

The quality of workmanship by all trades involved has been overseen by Bill and he has made sure it has been done in an excellent and timely manner. The emergency department has not had any shut down of activity. The workforce's respect for patient privacy and cooperation in working with the hospital staff has enabled this job to run as smooth as possible under difficult conditions.

These are some of the reasons that x ray room 2 and the nurse manager's office were awarded to Landau Building Company.

Success of any project hinges on the supervision and in this respect, both Steve and Bill have been exemplary. If any further work is awarded to Landau, I would strongly recommend Steve and Bill to handle the project.

Sincerely,

Mr. Anthony Zelenka
Vice President
