To Whom It May Concern:

RE: Landau Building Company
9855 Rinaman Road
Wexford, PA 15090

Over the past several years it has been my pleasure to work with Dale Dixon and most recently with Landau Building Company. Both Dale and Landau exhibit the qualities of a top shelf general contractor. They are well organized, able to shift resources, seeming at will, to accommodate the needs of a demanding client while keeping the job on schedule and on budget. It has been my pleasure to work with Dale on several projects of very short duration that have demanded a high level of site coordination. The latest of which was a renovation to all of our ICU beds. This while the ICU's where in full operation and near full capacity, over the Thanksgiving and Christmas holidays. Dale worked with both myself and with the ICU staff to ensure the schedule was maintained all the while maintaining the hospitals Patient First philosophy. In spite of several unanticipated work stoppages due to the "full" condition in the ICU's Dale was able to bring this project in several days early, on budget and with out any complaint from staff or patients.

I would recommend Landau and Dale Dixon with out hesitation for your most demanding and complicated projects.

Very truly yours,
